PREFACE.

The Third Volume of the Siamese Cat Register contains over 700 entries and therefore shows a big increase on Vol. II, as the present Vol. only covers a period of two years and nine months, whereas Vol. II which contained only 547 covered three years, it will thus be very evident that the breed still maintains its popularity, although I note with great regret that in spite of there being so many Breeders, a vast majority do not support the Siamese Cat Club's enterprize in publishing these Registers, by making use of obtaining a copy and by so doing, save themselves labour in verifying pedigree and at the same time insure the Club against financial loss on the undertaking. If these Registers are of any help to Breeders, and they wish them continued, they must bear in mind that the future issues depend entirely on the demand for this and the previous Volumes. I however will not probably have the pleasure of compiling any future Volumes, they will no doubt be in more capable hands. I should however like to thank all those members of the Club who have said kind words in appreciation of my past efforts and can assure them that I am more than repaid for any time or trouble I have spent on these Volumes, if they have achieved the end I aimed at, viz:— to simplify and verify the pedigrees of Siamese Cats.
